Setting PvPlus up on MAC: (Newer operating systems)
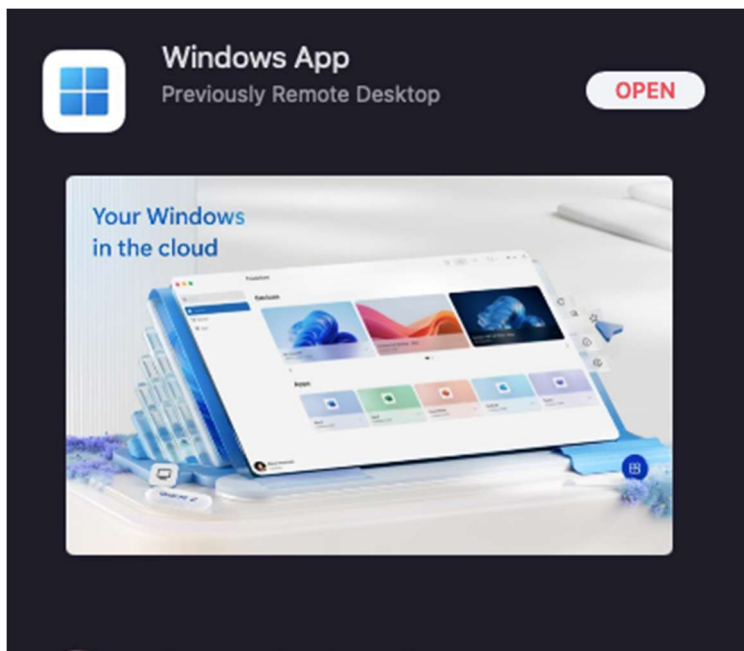

#1 Downloading the Remote Desktop App

Launch the Mac App Store app.

Run a keyword search for "**Windows App**". (Previously Microsoft Remote Desktop)

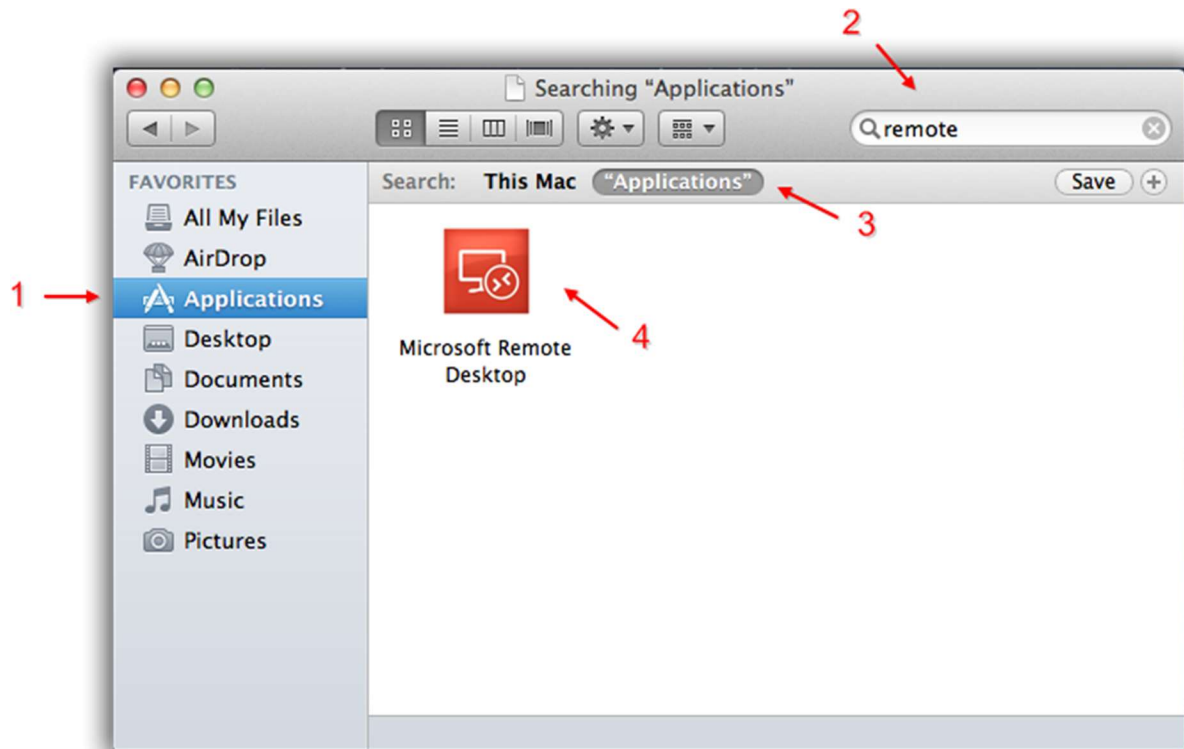

Click the *Get* button.

Enter your **Apple ID** and proceed with the download. (If Prompted)

Open the **Finder**

Navigate to **Applications**, search "Remote" in the search box, and double-click on the **Microsoft Remote Desktop App** to launch the program.

Once the app is launched we suggest keeping it in your **dock**. Right-click the app
**>** Options **>** Keep in Dock.

Now click on your new icon to begin setting up the PvPlus connection.

 or (depends on what update of Mac OS you are using)

#2 Create and Configure a New Remote Connection

When you first launch the app it will look like this:

Click the **(+) Add** button.

This will open the **Add PC** Screen.

- **PC name:** caifarm.pvplus.com:1494
- Click the dropdown next to **User Account** and add a new user.
- **User name (example):** PvPlus\johndoe **(Must use backslash)**
- **Password:** is chosen by customer and will be case sensitive.
- **Friendly name**: PvPlus
- Click **Add**

Do NOT edit any other settings.

Edit PC

PC name: `caifarm.pvplus.com:1494`

User account: PvPlus

| General | Display | Devices & Audio | Folders |

Friendly name: `Optional`

Group: Saved PCs

Gateway: No gateway
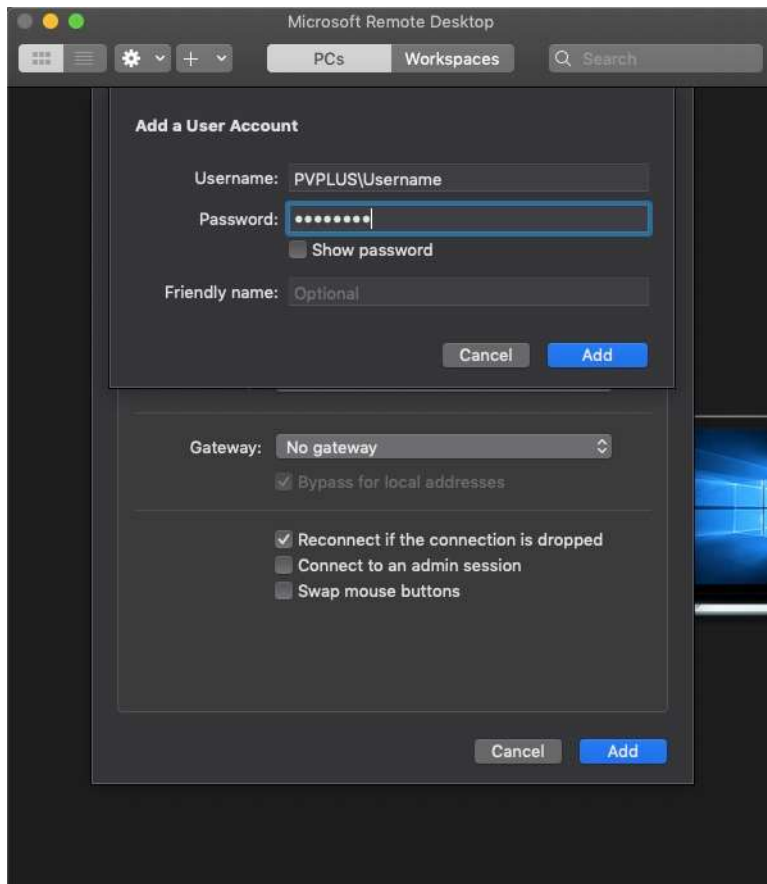

☑ Bypass for local addresses
☑ Reconnect if the connection is dropped
☐ Connect to an admin session
☐ Swap mouse buttons

Cancel   **Save**

*You can now click the **Add** button to finish adding the new remote connection.*

Your new "**Desktop**" will now display.

You may now click on the connection to launch PvPlus!
